Rinat Turysbekov - Firmware Developer

Contact:
Email: rinat.turysbekov@example.com

Summary:
Firmware Developer with experience in developing and optimizing firmware for embedded systems. Proficient in C, C++, and assembly languages. Known for improving system stability and performance in resource-constrained environments.

Skills:

- Embedded Firmware Development (C, C++)

- Microcontroller Programming (ARM, AVR)

- Real-Time Operating Systems (RTOS)

- Hardware-Software Integration

- Debugging & Optimization

Professional Experience:

- **Firmware Developer**, Embedded Systems Inc.
  Developed firmware for IoT devices, optimizing power consumption and system performance.

- **Embedded Systems Engineer**, TechEmbedded Solutions
  Conducted firmware testing and debugging, ensuring reliability in embedded applications.

Education:
Bachelor's in Electrical Engineering, Satbayev University
